Dear Prof. Tole,

Thank you for your letter from 28 February 2018. We appreciate your efforts and commitment and we would like to assure that you have our comprehensive support.

The draft you have already developed does reveal your objective for a more dynamic and open academy, to render its role in a knowledge-based society. It is important, in our view, that this ambitious expression fits in with the proper placement within the community and the system of science in the country, so that there is provision for all actors to harmonize their efforts and institutional capacities. We believe it is important to extend the spirit in the draft law to proper mechanism in the statute and by-laws and provide for its implementation

We wish you success in the challenging endeavor.

Best regards
